Answer: Joseph Lister

7. Which scientist strongly advanced the germ theory of disease?

Answer: Louis Pasteur

8. Which reformer became widely known for nursing reforms during the Crimean War?

Answer: Florence Nightingale

9. Who coined the term 'cell' in 1665?

Answer: Robert Hooke

10. Who argued in 1838 that plants are made of cells?

Answer: Matthias Schleiden

11. Which scientist extended cell theory to animals in 1839?

Answer: Theodor Schwann

12. Who popularized the idea in 1855 that cells come from pre-existing cells?

Answer: Rudolf Virchow

13. Who published pea plant findings in 1866 that became foundational to genetics?

Answer: Gregor Mendel

14. Whose X-ray diffraction work was crucial to revealing DNA structure?

Answer: Rosalind Franklin

#### FUNNY HUMAN BODY TRIVIA

1. Those little skin bumps called goosebumps happen when what contracts?

Answer: Tiny muscles at hair follicles

2. Where is earwax produced?

Answer: In the ear canal

3. When you bonk your so-called funny bone, which nerve is usually involved?

Answer: The ulnar nerve

4. Nose irritation can set off a sneeze through which nerve?

Answer: The trigeminal nerve

5. What are hiccups, really?

Answer: Sudden spasms of the diaphragm

6. A yawn includes a wide opening of the jaw and what else?

Answer: A deep breath

7. Which muscle wins the body-size contest by volume?

Answer: The gluteus maximus

8. What glands make saliva?

Answer: Salivary glands

9. Where are the tonsils located?

Answer: At the back of the throat

10. What little dangly structure hangs from the soft palate?

Answer: The uvula

11. Nails are made mostly of which protein?

Answer: Keratin

12. Which glands help cool the body by releasing sweat?

Answer: Sweat glands

13. Which glands release oily sebum into hair follicles?

Answer: Sebaceous glands

#### FUN HUMAN BODY TRIVIA

1. Which blood cells lose their nucleus when mature?

Answer: Red blood cells

2. What is the smallest bone in the human body?

Answer: The stapes

3. How many bones are in one human hand?

Answer: 27 bones

4. How many bones are in each human foot?

Answer: 26 bones

5. Which bone is the only one that does not directly join another bone?

Answer: The hyoid

6. The appendix is attached to which part of the large intestine?

Answer: The cecum

7. Which hormone is made by the pancreas?

Answer: Insulin

8. What substance does the liver produce to help with digestion?

Answer: Bile

9. How do the lung lobes usually differ between the left and right lungs?

Answer: Left has two lobes and right has three

10. What bone is commonly called the collarbone?

Answer: The clavicle

11. Name the bone of the upper arm.?

Answer: The humerus

12. Which lower-leg bone is the larger one?

Answer: The tibia

13. In anatomical position, which forearm bone lies on the little-finger side?

Answer: The ulna

#### HUMAN BODY FAMILY TRIVIA

1. Which brain structure sits beneath the cerebrum at the back of the brain?

Answer: Cerebellum

2. What structure is strongly involved in memory formation?

Answer: Hippocampus

3. What fluid cushions both the brain and spinal cord?

Answer: Cerebrospinal fluid

4. Which space contains cerebrospinal fluid?

Answer: The subarachnoid space

5. Taste buds are concentrated in what tongue structures?

Answer: Papillae

6. Which tendon connects calf muscles to the heel bone?

Answer: The Achilles tendon

7. What type of joint mainly allows movement in one plane?

Answer: A hinge joint

8. How many major types of muscle tissue are there in the human body?

Answer: Three

9. What are hormones?

Answer: Chemical messengers released by endocrine glands

10. Which node is located in the right atrium of the heart?

Answer: The sinoatrial node

11. Which valve lies between the left atrium and left ventricle?

Answer: The mitral valve

12. What is the liquid part of blood called?

Answer: Plasma

#### EASY HUMAN BODY TRIVIA

1. How many bones does a typical adult human have?

Answer: 206 bones

2. How many chambers are in the human heart?

Answer: Four chambers

3. Which organ covers the body's outer surface and is the largest by surface area?

Answer: Skin

4. The femur is found in what part of the body?

Answer: The thigh

5. What is the common name for the scapula?

Answer: Shoulder blade

6. Which bone sits at the front of the knee?

Answer: Patella

7. The brain is housed inside which cavity?

Answer: The cranial cavity

8. In which body cavity are the lungs located?

Answer: The thoracic cavity

9. Where is the liver mostly located in the body?

Answer: The upper right abdomen

10. Which small organ is tucked beneath the liver?

Answer: Gallbladder

11. The urinary bladder is located in which cavity?

Answer: The pelvic cavity

12. What lines the back of the eye?

Answer: The retina

13. The cochlea belongs to which part of the ear?

Answer: The inner ear
